

The Southern Hemisphere Wheel of the Year

This version of The Wheel of the Year is the most popular model. It has eight events that were celebrated by people from the Viking Age and earlier.

This version was created in 1975 for the modern lifestyle by a Norse pagan revivalist group. It uses events that date back to the 1300s (around 700 years ago). These events drew inspiration from their own Norse pagan customs and those from neighbouring areas.
